To : Les Sprenger, FIT - RPO  
From : Susan Kennedy, E&E FIT  
Date : September 3, 1987  
Subject: Transmittal of Updated HRS Package for Richardson Flat  
Tailings, TDD F08-8707-01.

Attached is a copy of the Hazard Ranking System package for Richardson Flat Tailings, updated as per MITRE quality assurance comments. The previous package is contained in E&E FIT Region VIII files under TDD R8-8508-07.

Most significant changes to the updated HRS package involve:

- 1) the inclusion of high-volume air sampling data which documents a release of contaminants to the air pathway, and 2) the removal of the previously scored groundwater pathway.

If you have any questions or comments, please contact me at 757-4984.

cc: Mike Hannigan - 2 copies (with references)  
Dave Schaller - 1 copy (without references)  
Paula Schmittiel - 1 copy (with references)
